challenges. Nevertheless, we have succeeded in continuing the legend, rather than eclipsing it. Special challenges in a country vehicle are a case in point. They are complemented by three fully lockable differentials. Can you climb the hills of Bel Air or slog through the Mojave Desert in second gear? From the red carpet straight to the desert, the G-Class is superior. The only limit is your imagination. If you want to get to the top, you'll find the G-Class. The ergonomics also contribute to the driver's sense of wellbeing and the feeling of being in control. Is it effortless? Just a few of the terms which greeted the G-Class Cabriolet when it was unveiled as the "Mercedes-Benz G-Class Edition 200". The higher you go, the thinner the air gets. Fortunately, this does not affect the G-Class, open or closed. Climbing, fording, clambering, mud-plugging, slogging - it has to be said, the G-Class gives you the feeling that you're never on your own when the going gets tough. Even if you've left less than a wheel behind. Nevertheless, we have succeeded in continuing the legend, rather than eclipsing it. Special challenges in a country vehicle are a case in point. **Above and beyond.** They are complemented by three fully lockable differentials. Can you climb the hills of Bel Air or slog through the Mojave Desert in second gear? From the red carpet

To drive a G-Class is to experience a vehicle that can rise to any occasion. As you would expect, it has all the attributes which make a Mercedes-Benz what it is: dynamism, comfort, safety and status. Yet it is different. Although it has been continually updated, modernised and equipped with technical innovations, the G-Class has remained true to its roots like practically no other vehicle: it has the same classic shape, the same rugged design, and the same mission to cope with extreme

conditions. These characteristics make it the only Mercedes-Benz that is at least as much at home off the road as on it. It is an unfailingly reliable partner which impresses whether parked at the kerbside or negotiating a mountainside. In fact, it is an object lesson in how staying resolutely down to earth is the key to attaining new heights of excellence.

The tree line only applies to trees.

Crazy? Outlandish? Superfluous? Just a few of the terms which greeted the G-Class Cabriolet when it was unveiled. Brilliant! Awesome! Incomparable! say those who really know: its drivers. There is just one superlative that can be added to this: the G-Class Cabriolet "Final Edition 200".

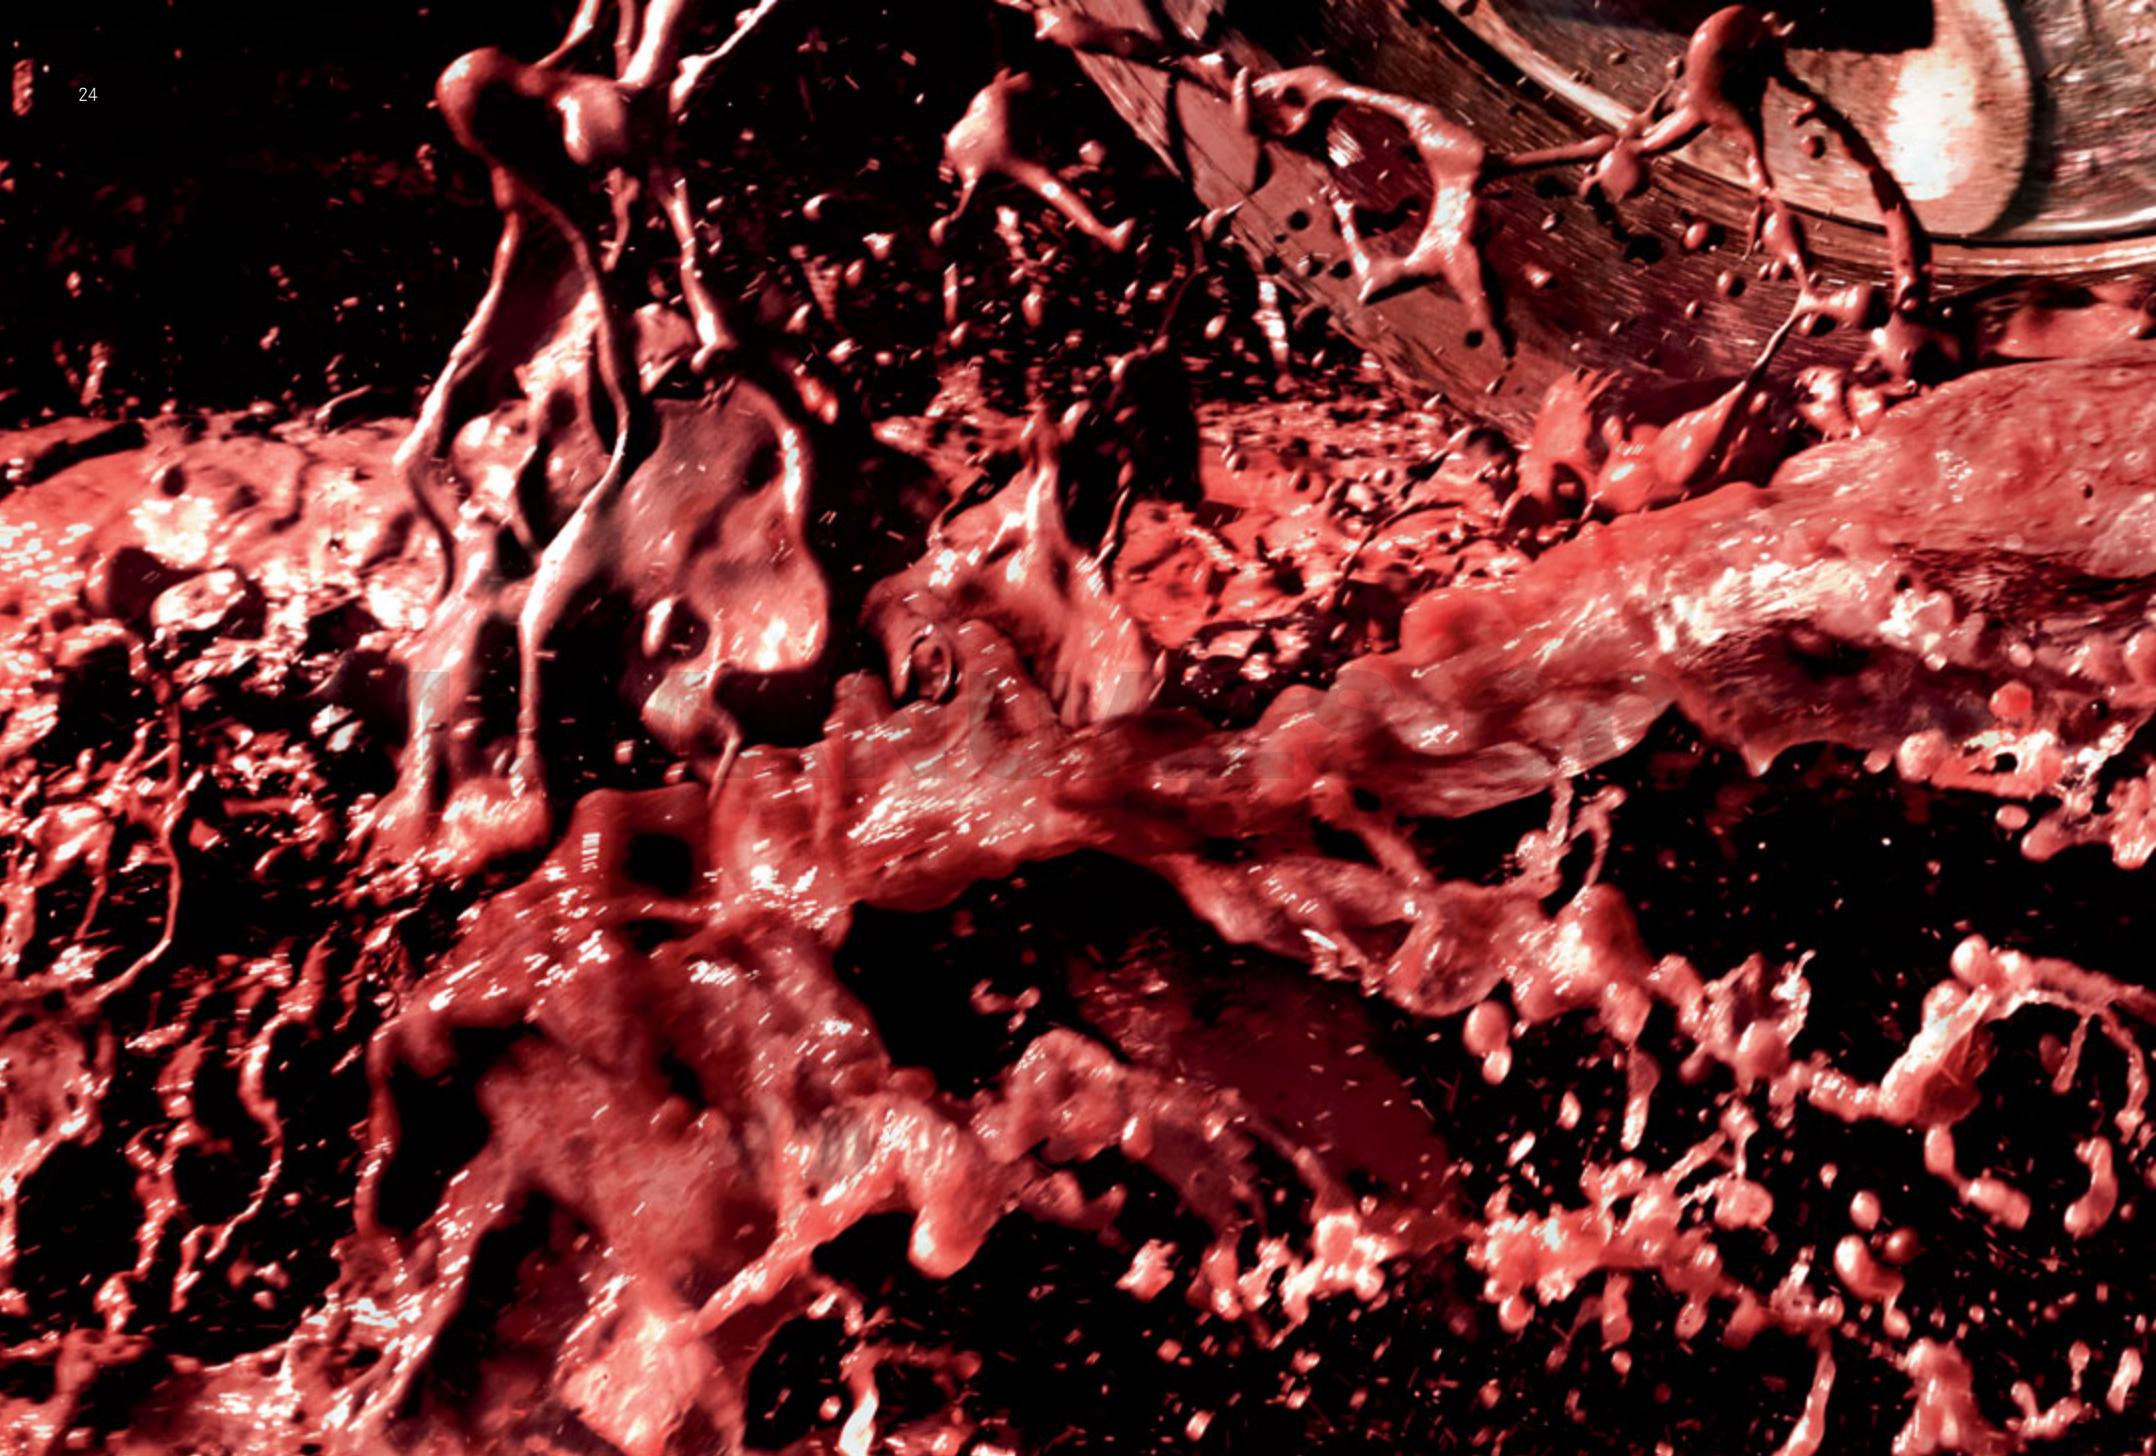

[gə'leɪnd]

əvɑːŋɡrɪ]

A single word can speak more eloquently than an entire manuscript. It projects pictures onto the retina of the mind's eye and sends emotions coursing straight to the heart. "Geländewagen" (the official German designation of the G-Class, which translates as "cross-country vehicle") is one such word. More than "off-roader" or "SUV", it conjures up images of loading supplies for an expedition, of poring over large-scale maps, of anticipation and excitement before the start and of the sense of being part of a great adventure. It is the invitation to plough through desert sands and the sense of

achievement on reaching places you had only ever dreamed of. It evokes the sound of the scree dislodged by the vehicle's progress, the swish of the tyres on endless sand tracks, the smell of rare drops of rain on parched grassland...

This inner film has countless plots, but always the same protagonist. Its name may not have found its way into the dictionary yet, but it has long occupied a unique place in the hearts of those who drive it: the G-Class.

Survival training.

The rain of the last few days has eroded the path so that it is now no more than a set of tyre tracks strewn with loose limestone scree. Someone has carved "I survived the Schöckl" into the bark of a beech tree. That just about says it all. Situated to the south of the Alps, the Schöckl is the birthplace of the G-Class – and one of the toughest off-road proving grounds in the world.

Can it really be that demanding? As if in answer, a G-Class suddenly bursts through the undergrowth, negotiates the rocky ascent noisily, treating knee-deep holes in its path with complete indifference as it goes. No sooner has it reached the top than the professional driver at the wheel hurls the Mercedes-Benz back down the slope again. The G-Class covers at least 30,000 kilometres under conditions such as these during the test phase. Because a vehicle that has survived the worst that the Schöckl can throw at it will be able to take just about any other challenge it may encounter in its stride.

The stuff that legends are made of.

Deutschmann nods. A slow, well-considered nod. Quite possibly the most influential head movement in the whole of the Graz Bergland region.

Some of his team watch him out of the corner of their eye before quickly getting back down to work again. With as many as 45,985 stitches to be placed, not to mention the countless cuts and folds, complete concentration and absolute precision are essential. The end result is then subjected to scrutiny by Herr Deutschmann, who has cast his unforgiving gaze over every G-Class for 33 years. A nod means excellent work. And if there is no nod? A vehicle which fails to attain the summit of perfection will never be allowed to leave the production facility in this picturesque, mountainous region of Austria.

The bobbins on the sewing machines hum as up to 810 metres of thread are dispatched on their mission to hold together the very heart and soul of every vehicle. No loop is too large, no stitch as much as a millimetre out of place. This accuracy and attention to detail reflect the passion which these skilled specialists – who are among the finest exponents of their craft – put into ensuring that every G-Class is a genuine Mercedes-Benz.

Diesel and petrol engine.

Plenty of torque on the road and off it: both the diesel and the petrol engine provide effortlessly superior power delivery for the G-Class.

The G 350 BlueTEC achieves its maximum torque of 540 Nm early – between 1600 and 2400 rpm.

6-cylinder diesel engine. Although the V6 common-rail diesel in the G 350 BlueTEC develops 155 kW (211 hp), it is optimised to reduce fuel consumption. Thanks to precise piezo injectors, an injection pressure of up to 1600 bar and an optimised turbocharger, it attains maximum torque of 540 Nm. Advanced catalytic converter technology helps to reduce this compression-ignition engine's emissions of nitrogen oxides by up to 80%. Cleaning and aftertreatment of the exhaust gases are carried out with the help of AdBlue® urea solution. If "Refill AdBlue®" appears on the display, the reduction agent can be replenished in a process as simple as refuelling. Containers of ISO 22241-compliant AdBlue® are available in the Mercedes-Benz Accessories range.

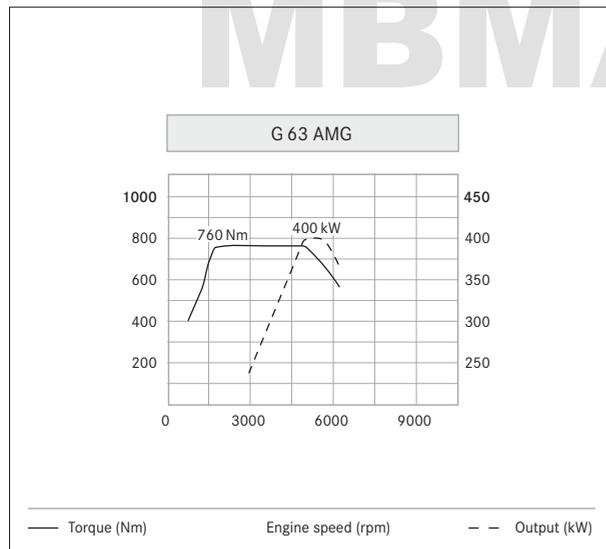

8-cylinder petrol engine. As well as being more than a match for even the most challenging terrain, the G 500 with its rated output of 285 kW (387 hp) is equally at home on fast motorway runs. The maximum torque of 530 Nm is available across a wide engine speed range from 2800 to 4800 rpm. This means that the G 500 Station Wagon accelerates from 0 to 100 km/h in 6.1 seconds and attains a top speed of 210 km/h. Optimum engine performance and reduced fuel consumption are ensured by infinitely variable intake and exhaust camshaft adjustment, four valves per cylinder and lightweight materials, such as magnesium, from the world of motorsport. The cylinder intake and exhaust ducts ensure an optimum air supply and so contribute to the increased output with reduced emissions. The characteristic V8 sound completes the G 500 experience.

The 6-cylinder diesel engine of the G 350 BlueTEC combines effortlessly superior pulling power in every situation with favourable fuel consumption figures and low emissions.

AMG engines.

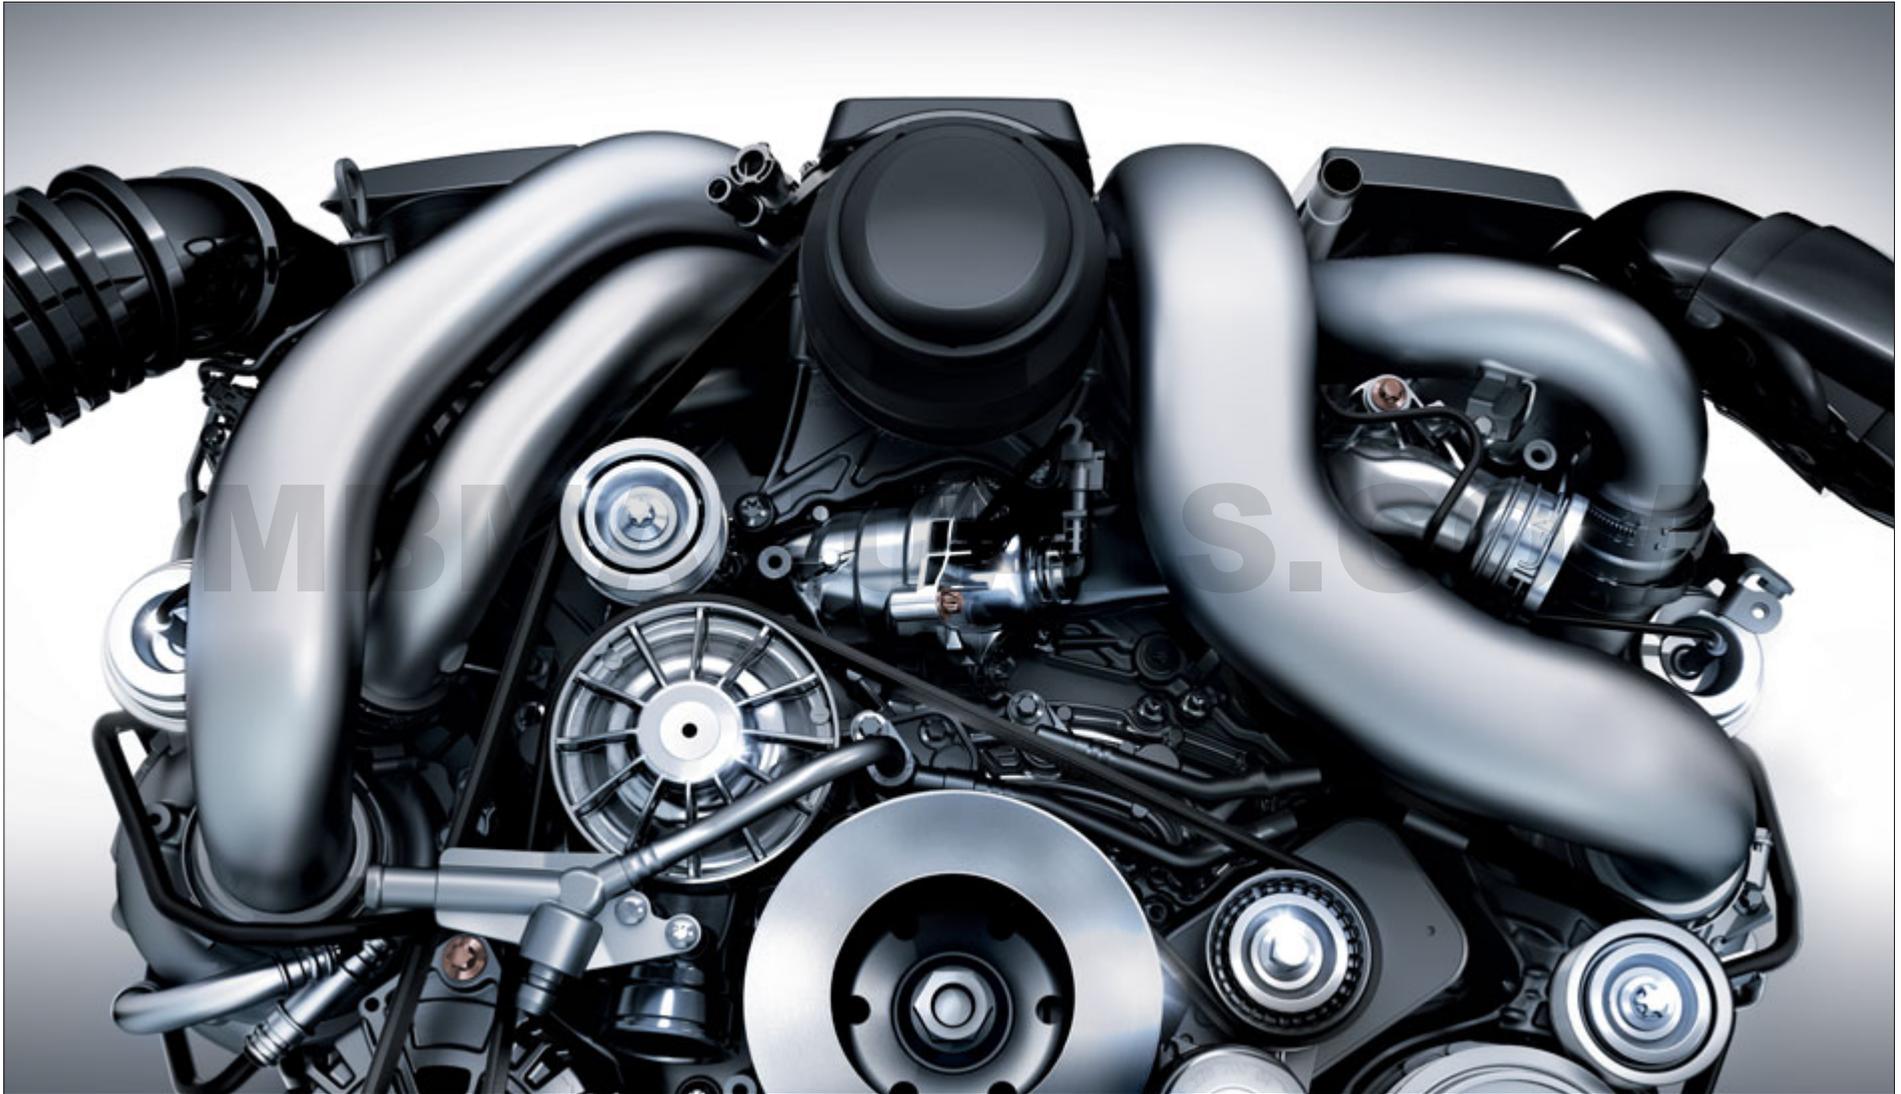

The two AMG 8- and 12-cylinder high-performance engines for the G 63 AMG and G 65 AMG offer maximum driving pleasure for drivers who like to make the most of their vehicles' power reserves.

The impressive torque of 760 Nm is available across a broad engine speed range from 2000 to 5000 rpm.

AMG 8-cylinder petrol engine. The responsive AMG 5.5-litre V8 twin-turbocharged engine of the G 63 AMG develops a maximum output of 400 kW (544 hp) and maximum torque of 760 Nm from its 5461 cc displacement. No other engine in this output category attains the performance of the new AMG powerplant. Acceleration from 0 to 100 km/h takes 5.4 seconds with the top speed electronically limited to 210 km/h. Spray-guided direct petrol injection with piezo injectors and twin turbochargers, four valves per cylinder with camshaft adjustment, air-to-water intercooling and the ECO start/stop function blend high efficiency with high output. The result is an engine which reconciles an involving, compelling driving experience with a degree of responsibility which is exceptional in this vehicle class and output category.

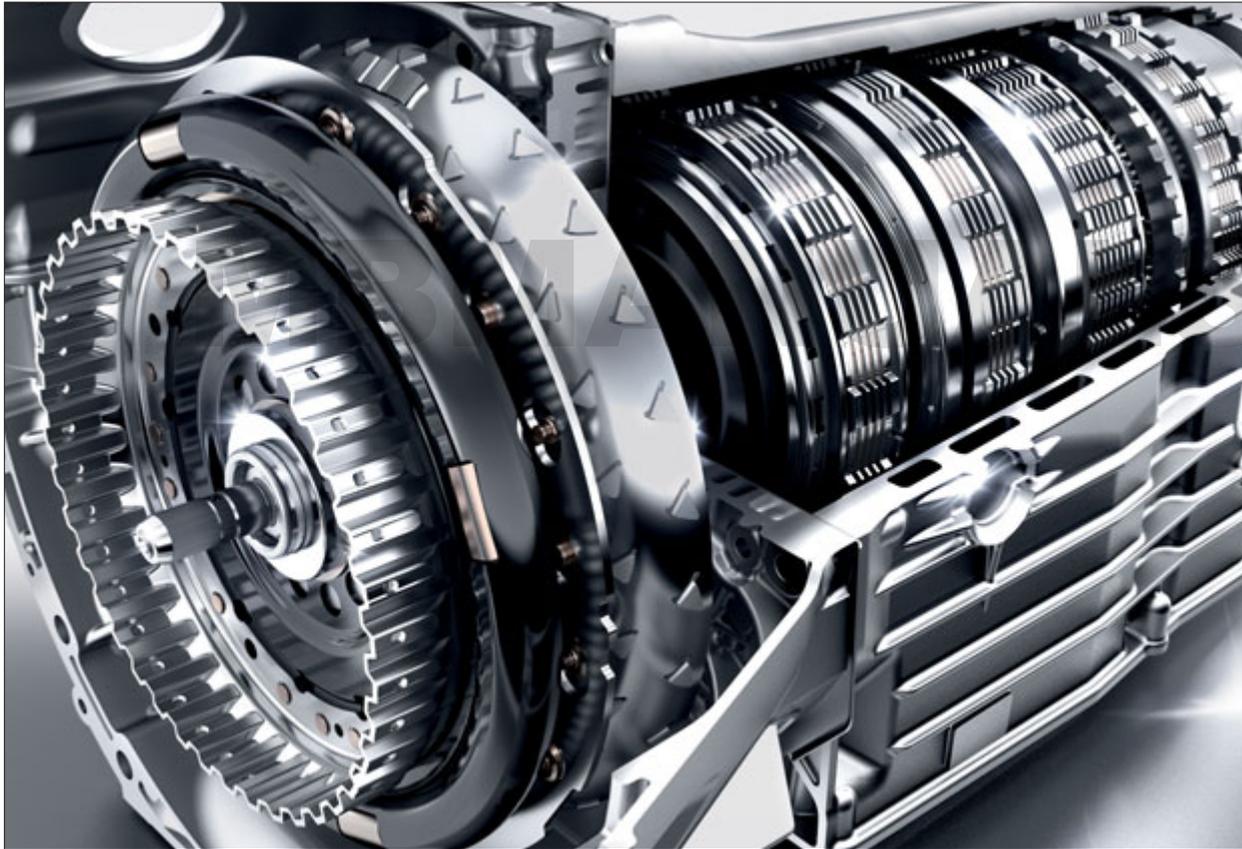

AMG 12-cylinder petrol engine. Featuring the ultimate in advanced technology, the 12-cylinder twin turbocharged engine of the G 65 AMG offers performance figures unprecedented in this vehicle class. This top-of-the-range engine equipped with twin turbochargers and an inter-cooler develops 450 kW (612 hp) with maximum torque of 1000 Nm (governed) which is available across the engine speed range from 2300 to 4300 rpm. The G 65 AMG accelerates from 0 to 100 km/h in 5.3 seconds and rapidly attains its electronically governed top speed of 230 km/h. Its responsiveness and smooth, refined running characteristics ensure hallmark Mercedes comfort on long journeys accompanied by the classic, rich, 12-cylinder sound.

The high-performance engine offers compelling acceleration and performance without neglecting the aspects of efficiency and environmental compatibility.

Transmission.

Whether called on to deliver dynamic on-road performance or an agile response to the challenges of off-road use, **7G-TRONIC** and **AMG SPEEDSHIFT PLUS 7G-TRONIC** are matched precisely to the different engines and adjust to the driving situation and driving style.

The G-Class enjoys excellent shift quality thanks to 7G-TRONIC.

7G-TRONIC (standard for G 350 BlueTEC and G 500). This automatic transmission increases ride comfort thanks to its particularly smooth gear change action. The spread over seven speeds means that the ideal ratio is always available and so ensures constant progress in the optimum engine speed range. This makes a measurable contribution to reducing fuel consumption and driving noise. Thanks to its multiple downshift capability, 7G-TRONIC can skip individual gears – jumping straight from seventh to fifth when overtaking, for example. Driving dynamics are also enhanced by the very short shift times enabled by 7G-TRONIC. Furthermore, there is no longer any interruption in tractive power during gear changes. Optimised driving characteristics when climbing, operating off-road or towing a trailer are the result.

The AMG SPEEDSHIFT PLUS 7G-TRONIC transmission manages power intelligently.

AMG SPEEDSHIFT PLUS 7G-TRONIC (standard for G 63 AMG and G 65 AMG). Now available in the G-Class for the first time, the AMG SPEEDSHIFT PLUS 7G-TRONIC represents automatic transmission technology in its highest form. The dynamic output of the AMG engines is managed brilliantly by the AMG SPEEDSHIFT PLUS 7G-TRONIC automatic transmission which ensures that the output of 400 kW (544 hp)/760 Nm or 450 kW (612 hp)/1000 Nm (depending on engine version) is delivered to the permanent all-wheel drive absolutely smoothly. Even more impressive is the fact that it does this with extremely short shift times and without any interruption to the flow of forward-thrusting power.

ECO start/stop function (standard for G 63 AMG). Exemplary fuel consumption figures are attained thanks to the ECO start/stop function. In the “C” – Controlled Efficiency – driving mode this function switches the engine off when the vehicle is stationary. When moving off again, the transmission shifts automatically into second gear. Shifting takes place as early as possible, for higher torque at lower revs, improved efficiency and reduced CO₂ emissions.

Chassis & suspension.

With its ladder-type frame, rigid axles, long suspension travel and high ground clearance of 21 cm, the G-Class is well-equipped to cope with even the most challenging terrain.

Ladder-type frame. The design of the G-Class, which makes it less vulnerable and more rugged than vehicles with an integral body, is also responsible for its exceptional durability and value retention. The ladder-type frame forms the extremely sturdy, load-bearing basis of the G-Class. Its bending resistance means that it is particularly well equipped to withstand the rigours of extended use in tough terrain. The frame is formed by two parallel longitudinal members, each of which consists of two U-shaped half-shells which are welded together and connected by

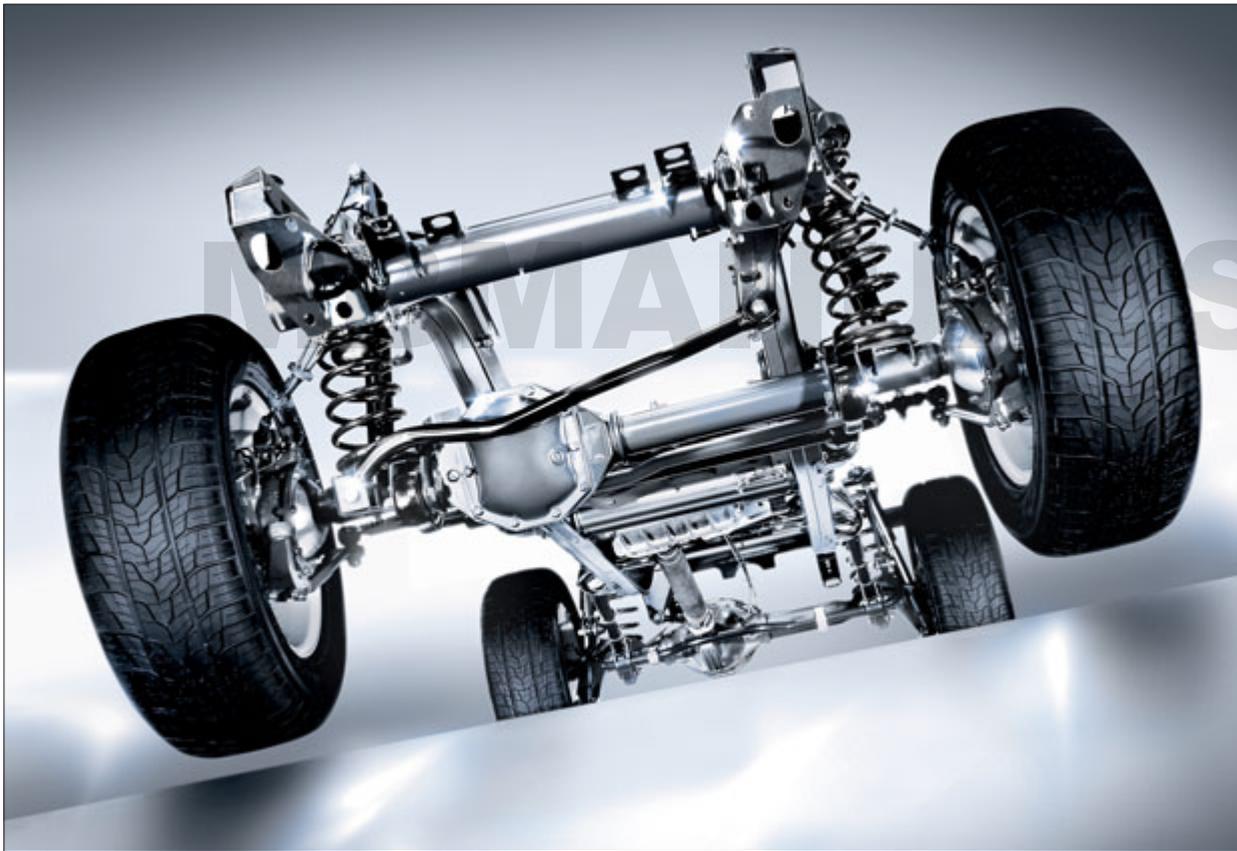

cross tubes. The body is bolted to the frame at eight points and rests on rubber mountings to keep vibration transmission to a minimum. In order to ensure the best possible corrosion protection, the frame is powder-coated, surface-treated and then painted. All cavities are waxed, the frame undergoes cathodic dip priming, and the underbody is given an additional plastic coating. In this way, the body offers practically no point of attack for water, snow, road salt or even desert sand. An important advantage of the solid, torsionally stiff ladder-type frame lies in its ability to

absorb torsional forces arising along the longitudinal axis and so prevent them from being transmitted to the body. Furthermore, the ladder-type frame forms the lowest part of the vehicle with no components projecting below it, the only exception being the axles. This protects the vehicle in the event of ground contact when operating in off-road terrain.

Steering. The power steering of the G-Class is specially designed for the rigours of off-road use. It owes its resilience and durability to the absence of vulnerable steering gaiters or rubber bellows. What's more, the power steering offers a high degree of ride comfort and uses the traditional recirculating-ball principle to prevent shocks from being transmitted to the driver's hands when negotiating obstacles.

The G-Class is exceptionally stable and durable thanks to its ladder-type frame.

Rigid axles. The chassis of the G-Class offers several advantages over independent suspension which is designed for on-road vehicles. It is based on two rigid axles, each of which is controlled by two solid longitudinal arms and one transverse control arm. Coil springs with long spring travel ensure good axle articulation, high ground clearance and outstanding traction off the road as well as agile and comfortable handling on it. High-performance gas-filled shock absorbers prevent any see-sawing effect from building up while two anti-roll bars, optimised in line with the vehicle's performance, kerb weight and payload, effectively reduce the body roll typically suffered by off-road vehicles during cornering. As both wheels of an axle are connected by high-strength steel tubes, their camber is always constant. The high degree of axle articulation and the even distribution of the wheel load across each axle enable ground clearance to be maintained at all times – even in the case of large obstacles – and are beneficial with regard to traction, too. These advantages also apply when negotiating challenging off-road terrain.

Rigid axles are extremely resilient, even when subjected to heavy loads during off-road driving, and offer constant ground clearance as well as optimum traction.

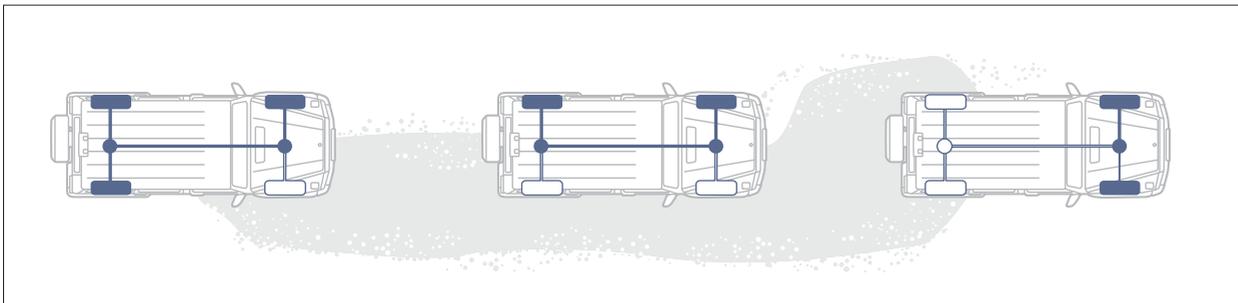

On-/off-road systems.

Outstanding off-road performance and reliable tractive power even under extreme conditions – the drive system.

Permanent all-wheel drive including 4ETS. The permanent all-wheel drive of the G-Class, the synchromesh transfer case with selectable low-range gear, the electronic traction system 4ETS as well as the three fully lockable differential locks form an ideal team. The permanent all-wheel drive ensures that all wheels always have the best possible traction and makes for improved driving dynamics and enhanced driving stability. As a rule, power is distributed between the front and rear wheels in a 50 : 50 ratio. Any differences arising between the rotation speeds of individual wheels are compensated by the differential to maintain optimum power delivery at all times. The electronic traction system 4ETS is a component of ESP®. It applies an individual braking

force to any wheels which are spinning and diverts the drive torque to the wheel or wheels with the best traction in the current situation. As a result, it is also possible to move off or accelerate when confronted with difficult conditions – such as ice – on the road or in less demanding off-road terrain. In challenging off-road terrain, the rigid axles provide the necessary ground clearance and outstanding traction to allow the permanent all-wheel drive to realise its full potential.

Differential locks. In the low-range mode the three fully lockable differential locks which can be engaged electrically ensure that the G-Class can even cope with challenging terrain in which only one wheel is able to gain traction. During extreme off-road use, it is possible to lock the front axle differential and the rear axle differential as well as the centre differential in the transfer case. The locks are engaged in accordance with the increasing need for traction by means of three switches in the centre console. 4ETS and ESP® are automatically switched off when the locks are engaged. With the differentials fully locked, exactly the same rotational speed is found at both axles and at each wheel. In this fully locked condition, the vehicle can proceed even if only one wheel has traction. This means that the G-Class is able to free itself from what would otherwise be an inextricable situation.

The electronic traction system 4ETS automatically transfers the drive torque to the wheels with the best traction.

The three electrically engageable fully lockable differential locks play a key role in the off-road capability of the G-Class.

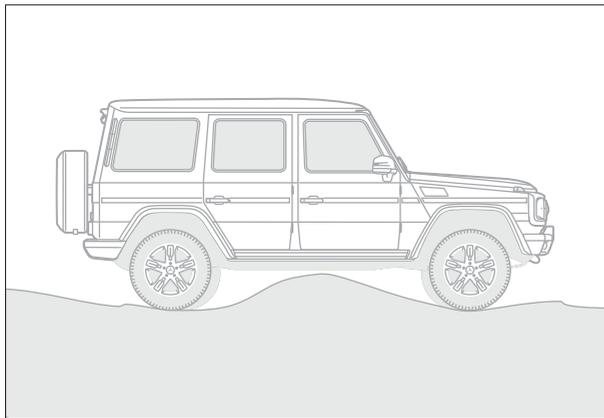

On-/off-road systems.

Sheer power, controlled intelligently: the low-range ratio, the electronic traction system 4ETS and the design of the G-Class make it a high-performance cross-country vehicle.

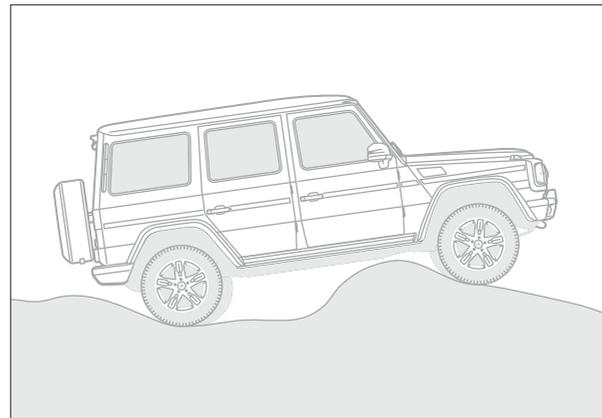

Low-range ratio (figures apply to standard production version). During ventures into difficult terrain, the driver is supported by the standard-fit low-range ratio integrated in the transfer case. If the transmission is set to “neutral”, a press of the low-range button at speeds below 40 km/h is all that is required to optimise the transmission of the

engine torque. In this way, it is possible to benefit from greater tractive force and improved control when operating at lower speeds. As a result, the vehicle can climb slopes with an incline of up to 100 percent (80 percent in the case of the AMG models) – or negotiate descents more easily without the wheel locking. This is particularly impor-

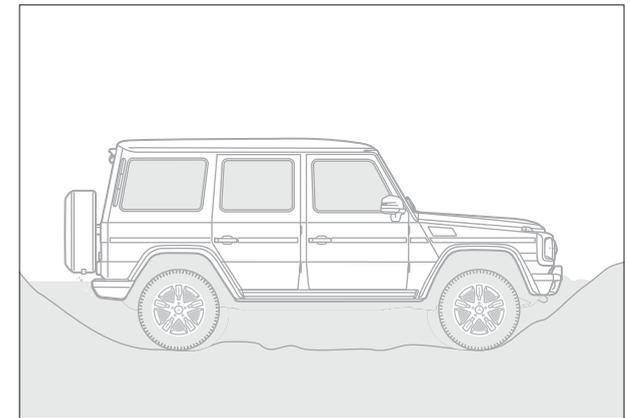

tant on changing and slippery surfaces, such as rock, grass or snow, as it ensures enhanced driving stability. The risk of the rear of the vehicle breaking away can be prevented and steering control can be maintained.

Ground clearance: 21 cm (AMG models: 22 cm).

Breakover angle 24°/cabriolet 27°.

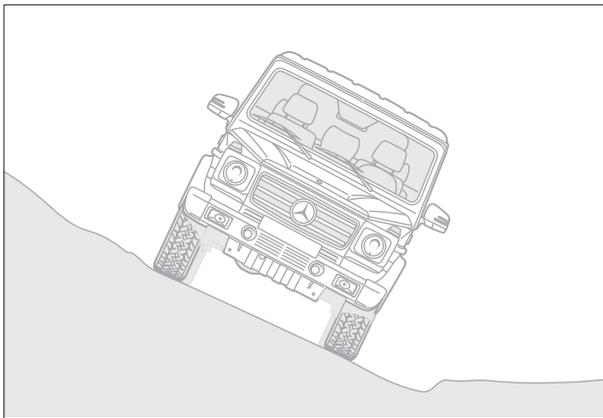

Maximum fording depth: 60 cm.

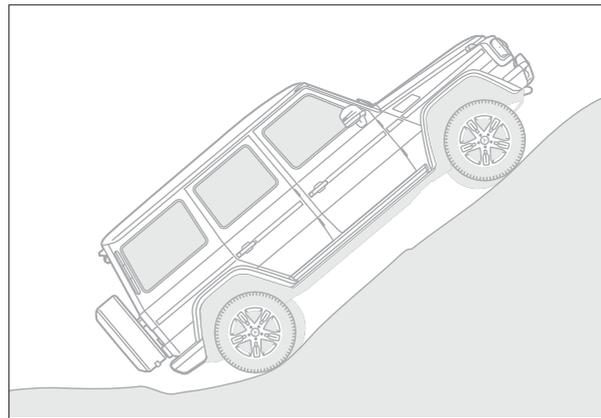

Special characteristics of the G-Class. A unique feature of the G-Class are the three 4ETS on-/off-road systems, the two-stage transfer case plus three fully lockable differential locks. The interplay between these systems allows operation in practically any terrain. Two rigid axles and protected drive components ensure robust cross-country

capability and maximum axle articulation. The G-Class can climb gradients of up to 100 percent (80 percent in the case of AMG models), where the surface conditions allow, remains directionally stable on lateral slopes of up to 54 percent, has ground clearance of 21 cm (AMG models: 22 cm) and can progress through water and mud with a

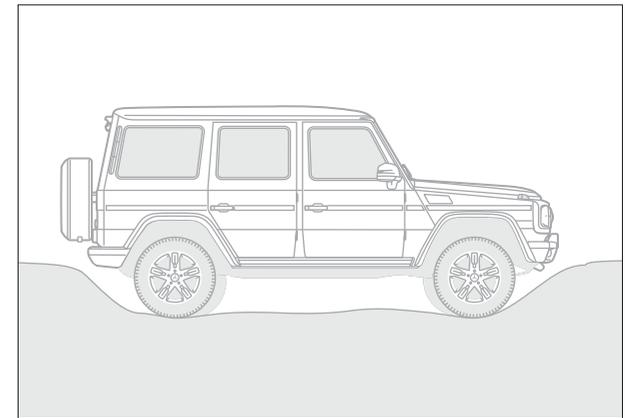

fording depth of up to 60 cm. Finally, the angle of approach is 36° (AMG models: 27°), the angle of departure is 27° and the breakover angle, as a function of the ground clearance, is also comparatively large.

Directionally stable on lateral slopes of up to 54%.

Slope-climbing ability up to 100% (80 percent in the case of AMG models), depending on ground condition.

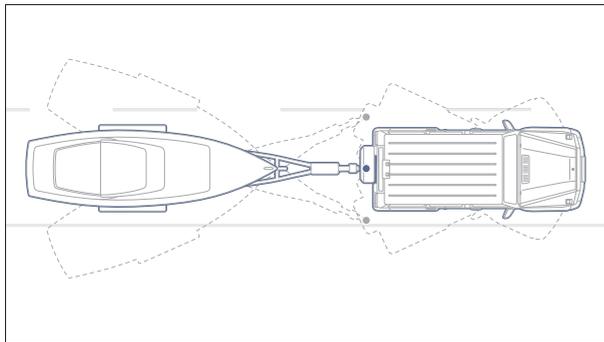

Angle of approach: 36° (AMG models: 27°). Angle of departure: 27°.

Integral safety concept.

The vision of accident-free driving impels us. With our integral safety concept we are coming closer to achieving this goal – this is a holistic approach which can increase safety in every situation.

ESP® incl. vehicle/trailer stabilisation (standard). Control systems optimise the performance of the braking system: the Electronic Stability Program (ESP®) can apply a selective braking force to individual wheels if necessary. Together with the anti-lock braking system (ABS) it provides greater stability when cornering. The ADAPTIVE BRAKE system's HOLD function can stop the vehicle from rolling backwards or forwards unintentionally in stop-and-go traffic or when waiting at traffic lights. Vehicle/trailer stabilisation can prevent oscillation of the vehicle/trailer combination from developing.

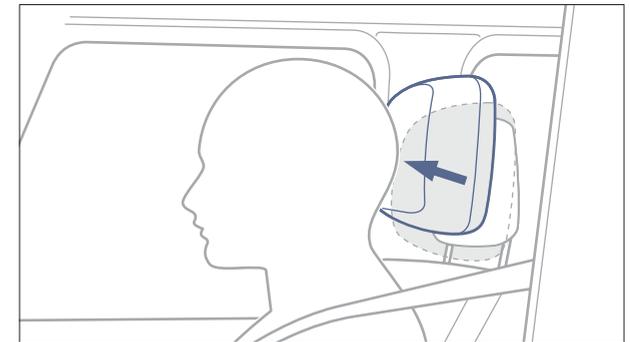

Vehicle/trailer stabilisation helps to ensure a safer journey when towing.

LED daytime running lamps (standard). The LED daytime running lamps are a characteristic feature of the vehicle's appearance and allow it to be seen more easily by other road users. The LEDs are arranged in light strips integrated in the headlamp surrounds.

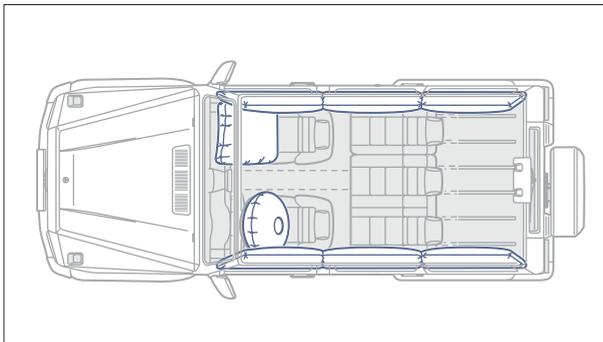

The LED daytime running lamps underline the appearance of the vehicle while enhancing safety.

NECK-PRO luxury head restraints (standard for all models except the G 65 AMG). The crash-responsive NECK-PRO luxury head restraints on the front seats can help to reduce the risk of whiplash injury. In the event of a rear impact, the head restraints are pushed forwards by around 40 millimetres and upwards by 30 millimetres, thus providing support for the heads of the front seat occupants at an earlier stage. The flexible side bolsters of the NECK-PRO luxury head restraints provide additional lateral support while also enhancing seating comfort.

The NECK-PRO luxury head restraints can reduce the risk of whiplash injuries significantly in the event of a rear impact.

Airbags (standard). The G-Class is equipped as standard with airbags for the driver and front passenger (with a seat occupancy sensor for the front passenger seat). Furthermore, the airbag on the driver's side responds adaptively in the event of an accident, deploying in one or two stages depending on the predicted impact severity and the characteristics of the accident. The G-Class Station Wagon is additionally equipped with large windowbags covering both rows of seats.

Windowbags covering both rows of seats (Station Wagon) are standard, as are airbags for the driver and front passenger.

DISTRONIC PLUS (option). This proximity control system uses a heated radar sensor to maintain the distance to the vehicle in front. Depending on the traffic situation – and even in snow and icy conditions – the system can throttle back or apply the brakes. If the gap is closing too quickly, an audible warning is given. Where emergency braking is required, Brake Assist (BAS) makes the necessary brake pressure available. Operating in a speed range of 0 to 200 km/h, the system reduces the strain on the driver, especially on motorways and in heavy traffic.

DISTRONIC PLUS proximity control helps the driver maintain the desired distance between the G-Class and the vehicle in front.

Blind Spot Assist (option). The optionally available Blind Spot Assist monitors the blind spot directly to the side of and behind the vehicle at speeds above 30 km/h. If the assistance system detects the danger of an impending collision when changing lane, it can warn the driver by means of a display in the exterior mirror. If the driver ignores this and activates the indicator, an additional audible warning is triggered.

Blind Spot Assist can increase safety when changing lane.

G-Class Station Wagon.

A timeless design classic, an exciting off-road legend, an overwhelming desire for freedom: the G-Class Station Wagon.

Clear lines and large, flat surfaces have defined the side view of the G-Class Station Wagon for over 30 years. The large window areas with heat-insulating glass between the A-, B-, C- and D-pillars, and especially the two large rear side windows, are a characteristic feature of this four-door model with its 2850 mm wheelbase. The side skirts as well as the beltline and roof edge are parallel for much of their length, as are the horizontal rub strips at door-handle height. More than just visual expressions of strength and stability, the distinctive wheel-arch treatment, the rear

section which widens towards the base and the wide track make a practical contribution to the almost unlimited off-road capability of the G-Class Station Wagon. The spacious cross-country vehicle also offers the occupants of the rear seats maximum comfort, both on long journeys and in challenging terrain, with features such as seat heating as standard. Another advantage of the Station Wagon is its large load compartment which has a maximum capacity of 2250 litres and is accessed easily via a large rear door hinged at the left. All this space can be

used flexibly thanks to the 1/3 : 2/3 split folding rear bench seat and the load retainers. A load compartment cover and a cargo net are optionally available. As the engine and chassis are designed for a towing capacity of 3.5 tonnes, the G-Class also lends itself to towing a boat, horse box or caravan, not least because of its ability to cope with difficult surface conditions.

Clear lines and characteristic design.

Also extreme: the travel comfort offered by the G-Class.

Ready to take on any terrain with any amount of equipment on board.

The G 350 BlueTEC with a distinctive front and the characteristic G-Class shape.

G-Class Cabriolet “Final Edition 200”.

Off-road, open-top: the cabriolet version of the G-Class with a soft top is unique in this vehicle category.

The robust G-Class Cabriolet has enjoyed a special status in its segment for over 30 years: it is unrivalled. Thanks to the clear shape and hallmark lines plus the characteristic soft top it was predestined from the outset to become the design classic it is today.

A classic which completes the final step on the road to legendary status with a unique special model: the G 500 Cabriolet “Final Edition 200”. The soft top can be electro-

The beige soft top turns the G-Class into a cabriolet whenever you want.

hydraulically operated and in its closed state it spans the rear compartment and load compartment. When open the beige-coloured tonneau cover folds up behind the C-pillar, which is set relatively far forward. Solid roll-over protection between the B-pillars and the two side windows in the rear compartment increases protection for the occupants and lends the vehicle the classic cabriolet look. This impression is reinforced by glass windows between the B- and C-pillar plus a window behind them in the soft top. The

The front seats are equipped with a heating function as standard.

radiator grille in chrome plus the 5-spoke light-alloy wheels painted titanium grey complete the characteristic appearance. A stylish “Final Edition 200” monogram on the B-pillar is an additional eye-catcher.

The semi-automatic beige-coloured soft top can be released, and at the press of a button it opens and closes within around 30 seconds. To ensure pleasant temperatures in the interior and to reduce driving noise the roof lining of the high-quality textile top is sound- and heat-insulated. The electrohydraulic soft top comes with a draught-stop as standard. The interior is characterised by the fine designo look. This includes sand-coloured and black designo leather seats, trim on the centre console in designo satin-finish light brown poplar wood plus the leather trim for the front doors featuring an exclusive diamond look. An AMG performance steering wheel also ensures a sporty driving feel.

Up to four occupants can enjoy a classic cabriolet driving experience wherever there is – or isn't – a road.

G 63 AMG.

The AMG G-Class models are in a class of their own. The G 63 AMG raises the bar yet again. → www.mercedes-amg.com

With a rated output of 400 kW (544 hp), the G 63 AMG develops maximum torque of 760 Nm yet remains extremely efficient thanks to the standard-fit ECO start/stop function. Exterior highlights: metallic paint, AMG radiator grille with chromed twin louvres, AMG wheel-arch flaring with “V8 BITURBO” logo, AMG exhaust system with twin chromed side tailpipes, AMG 5-twin-spoke light-alloy wheels in titanium grey with red-painted brake callipers and 275/50 R 20 tyres. The stylish look is completed to perfection by the standard-fit Exterior Stainless Steel package.

Interior: illuminated AMG stainless steel door sill panels, seats in designo leather, leather-trimmed dashboard and AMG performance steering wheel as well as door centre panels in ruffled leather, headlining in anthracite Alcantara® as well as ambient lighting. The standard-fit Chrome package with designo trim in a choice of three versions complements the dynamic impression created by the interior which can also be ordered with carbon-fibre trim.

G 65 AMG.

The most powerful G-Class of all time makes no secret of its unique position among high-performance cross-country vehicles. → www.mercedes-amg.com

The first G-Class to be equipped with a V12 engine, the G 65 AMG develops 450 kW (612 hp) from a displacement of 5980 cc and maximum torque of 1000 Nm. The phenomenal pulling power and acceleration represented by these figures are matched by the exceptional standard equipment with metallic paint and the Exterior Stainless Steel package. Also included are AMG 5-spoke light-alloy wheels with 275/50 R 20 tyres and red-painted brake callipers framed by AMG wheel-arch flaring with a “V12 BITURBO” logo as well as an AMG exhaust system with twin chromed tailpipes on both sides of the vehicle and an appropriately impressive sound. Particularly striking features are the AMG radiator grille with chromed twin louvres backed by the characteristic diamond-pattern mesh, also in chrome, as well as brushed aluminium-effect inserts with AMG lettering. In addition to these features, the G 65 AMG is equipped as standard with an AMG performance steering wheel and all the exclusive details of the Chrome package.

The G 65 AMG is equipped as standard with the designo Exclusive package with AMG front sports seats. The seats and door centre panels as well as the insert in the rear door are trimmed in diamond-pattern designo leather while black designo leather features on the upper and lower sections of the dashboard. The two-tone designo leather interior is available in six combinations.

All the seats of the G 65 AMG have NECK-PRO luxury head restraints, the front ones bearing an embossed AMG emblem. Also standard is the Seat Comfort package including climatized multicontour front seats.

Multimedia systems.

As well as supporting the driver with navigation assistance, the multimedia systems in the G-Class serve above all to provide entertainment tailored to the individual requirements of all the passengers.

COMAND Online (standard). This feature combines audio and navigation systems with telephone and internet functionality. Entertainment is provided by a DVD drive and the Music Register with a 10 GB hard disc, the standard USB and Bluetooth® interface plus online access via an internet-capable mobile phone. LINGUATRONIC allows the functions to be operated by voice entry. In the latest version the features it boasts include photo-realistic map display, Windows and iPhone® compatibility plus internet radio. With an optional TV receiver, passengers in the G-Class can even watch broadcast television programmes.

The multimedia system with HDD navigation has a high-resolution display with TFT technology with a 17.8 cm screen diagonal.

Harman Kardon® Logic 7® surround sound system (option). Equipped with 12 loudspeakers and a 10-channel DSP amplifier, this 450-watt Dolby Digital 5.1 system provides first-class acoustics for all seats. The 3D surround sound and speed-sensitive volume control ensure constant listening pleasure.

12 loudspeakers and 450 watts for full-bodied sound: the Harman Kardon® Logic 7® surround sound system.

Rear Seat Entertainment System (option). The Rear Seat Entertainment System fitted to the rear face of the front head restraints comprises two DVD players with TFT colour displays (17.8 cm screen diagonal), remote control and Aux-in connections as well as two sets of wireless headphones. Rear passengers can watch films or connect a games console during the journey. Both displays can be used independently of one another.

The two displays of the Rear Seat Entertainment System mounted on the front-seat head restraints.

Assistance systems and Seat Comfort package.

A range of assistance systems and enhanced seat comfort can make the driver's task easier in a number of ways.

Reversing camera (option). The reversing camera with a wide-angle lens monitors the area directly behind the vehicle and sends the images to the COMAND display. It is activated automatically when reverse gear is engaged, thus enhancing safety when manoeuvring into a parking space. The reversing camera is only available in conjunction with the optional PARKTRONIC system.

PARKTRONIC (option). PARKTRONIC can warn the driver automatically if there is a risk of the space in front of or behind the vehicle becoming tight when parking or manoeuvring. The system operates on the echo sounder principle. Sensors on the front and rear bumpers emit ultrasonic signals which are then reflected by other vehicles or obstacles. A microcomputer calculates the current distance and informs the driver by means of displays on the dashboard and audible signals.

Seat Comfort package (option, standard for G 65 AMG). The climatized multicontour seats of the Seat Comfort package make journeys in the G-Class – especially long ones – particularly comfortable. Features such as electric height adjustment and continuously variable seat cushion inclination adjustment enhance comfort and ergonomics noticeably. The lumbar support can prevent symptoms of fatigue by providing additional support for the back. It is certified and recommended by AGR, a German association which promotes high-quality orthopaedic design.

During parking, the COMAND Online central display shows the area behind the car.

The light-emitting diodes of the PARKTRONIC system indicate the distance to an obstacle.

Multicontour seats can enhance driver-fitness safety.

AMG selector lever.

Sliding sunroof, electrically operated (for Station Wagon).

Auxiliary heater with remote control.

Ball-head trailer coupling.

Privacy glass in rear doors, load compartment side windows and load compartment door (for Station Wagon).

Chrome package.

Brilliantly expressive: the Chrome package stands for heightened elegance.

With its three chromed louvers, the optional Chrome package (standard for AMG models) makes a brilliant impression. In the case of the AMG models, this is underlined in an exclusive way by the additional differentiation of the radiator grille design. Inside, stylish design elements, continuous chrome trim around the wooden fascia for the seat adjustment switches and chrome rings around the loudspeakers in the front doors embody a new level of individuality which extends to the smallest details. The theme continues all the way to the chromed load sill protection which features “Mercedes-Benz” lettering or “AMG” (in the case of AMG models).

Exterior Stainless Steel package.

Clarity, elegance, refinement: stainless steel simply conveys that certain something.

An interesting enhancement for the G-Class is available in the form of the Exterior Stainless Steel package (standard for AMG models), featuring running boards and a spare wheel cover in stainless steel with a 3D Mercedes-Benz star.

Sports package.

Ensures that the G-Class makes a particularly sharp impression: the Sports package.

MBMANUALS.COM

The stripe-effect inserts in anthracite are irresistibly sporty.

The stainless steel spare wheel cover is a brilliant finishing touch.

The new, optional Sports package (for G 350 BlueTEC and G 500) gives the design of the G-Class additional dynamism and individualises it to a high standard. The Sports package includes the Exterior Stainless Steel package with left and right running boards and a spare wheel cover in stainless steel with a 3D Mercedes-Benz star. AMG wings and optionally available 5-spoke light-alloy wheels in titanium grey with 265/60 R 18 tyres add particularly powerful emphasis to the exterior design. Rub strips with inserts in stripe-effect anthracite and a sports exhaust system (for G 500 Station Wagon only) complete the impressive picture. Velour floor mats provide the final interior touch for the package. The Sports package is only available in conjunction with the Chrome package.

The distinctive identity of the G-Class is highlighted and developed in an extremely expressive way by the components of the Sports package.

Exclusive package.

As the name suggests: an exceptional combination of high-quality appointments.

The optional Exclusive package (for G 350 BlueTEC and G 500) combines fine appointments to meet exacting requirements. In combination with upholstery in leather or designo leather the dashboard is trimmed in leather. The driver and front passenger benefit from the comfort offered by the multiple adjustment options provided by the climatized multicontour seats from the Seat Comfort package. Ambient lighting integrated in the dashboard, door trim and footwells can be dimmed to any level to highlight the stylish interior and create a unique lighting atmosphere. Even the process of getting in and out is accompanied by a special lighting effect thanks to the illuminated door sill panels. Headlining in fine anthracite Alcantara® (for Station Wagon models) characterised by an attractive look and feel adds the finishing touch to this high-quality interior. The Exclusive package offers an interesting starting point for further individualisation of the G-Class. The Seat Comfort package is also available as an option on its own.

designo Exclusive package.

The designo Exclusive package lends the interior an exceptionally exclusive ambience.

The distinguished character of the AMG models is underlined to great effect by the designo Exclusive package (optional for G 63 AMG, standard for G 65 AMG). It features sports seats in two-tone designo leather – available in six colour schemes – for the driver and front passenger. The door centre panels as well as the cushions of all the seats have a quilted diamond pattern. The dashboard trimmed in designo leather and the AMG emblem (an additional feature of the G 65 AMG) on the head restraints make it perfectly clear that this is no ordinary vehicle – and that the quality and character of the interior are also exceptional. The designo Exclusive package is only available in conjunction with the Seat Comfort package (standard for G 65 AMG).

Upholstery and trim.

For the black colour scheme it is possible to choose between seat covers in fabric and optional upholstery in leather. The interior is predominantly in black with contrast provided by the standard grey headlining. Alcantara® headlining in anthracite is standard for AMG vehicles and an option for all others in combination with fabric upholstery or leather appointments. Trim elements in anthracite poplar wood are standard in combination with a black nappa leather steering wheel for the G 350 BlueTEC. Trim elements in high-gloss brown burr walnut are available as an option in combination with a wood/leather steering wheel in high-gloss brown burr walnut. The black colour scheme can also be combined with optional designo trim elements.

designo.

Individuality at its most alluring: the comprehensive designo range of optional paint finishes and interior appointments gives any G-Class its own uniquely luxurious identity. → www.mercedes-benz.com/designo

designo appointments allow customers seeking a unique identity for their vehicles to select their appointments in accordance with their own particular ideas and preferences. All design requests are implemented using carefully chosen materials which are painstakingly crafted by hand using traditional skills. In the case of the G-Class, the range comprises eight different exclusive designo paint finishes: designo metallic (designo mocha black, designo graphite, designo platinum black), designo mystic (designo mystic blue, designo mystic red, designo mystic brown) and the designo magno matt paint finishes (designo magno platinum and designo magno night black).

The interior indulges the senses with high-quality, hand-stitched single-tone designo leather upholstery, again in a choice of eight attractive colours: designo porcelain, designo marron, designo classic red, designo black, designo light brown, designo sand, designo mystic red and designo titanium pearl. The appointments also comprise door panels in ruffled leather, velour floor mats with a designo leather surround and headlining in anthracite Alcantara®. In the case of the G 63 AMG the upholstery in designo leather is included as standard. And in the case of the G 65 AMG it even takes the form of two-tone designo leather with an exclusive quilted diamond pattern. The most eye-catching interior features are the designo wood/leather steering wheel and the selector lever with an AMG emblem – included as standard for AMG models. The optional designo Exclusive package (standard for the G 65 AMG)

can be ordered to enhance the G 63 AMG, which is already equipped as standard with a comprehensive selection of high-quality appointments, with even more impressive details. Climatised multicontour front seats must also be fitted when the designo Exclusive package is ordered.

Services.

Mercedes-Benz Financial Services. Our sophisticated leasing and financing products are tailored to your individual financial needs, giving you the opportunity to drive your dream car while staying financially flexible. Once you have chosen a model, you can enjoy the peace of mind of knowing that both the vehicle itself and our insurance products will keep you particularly well protected. What's more, our range of service products is designed to ensure that your car stays in top shape while offering transparent, manageable conditions. For further details, speak to your Mercedes-Benz dealer, who will be glad to go through the latest financial services and terms and conditions with you.

Mercedes-Benz mobility. Your new car comes complete with the promise of feeling safe on the road. But if you should ever need assistance, Mercedes-Benz Service24h is there to help. Just call the freephone service hotline on 00800 1 777 7777¹. The integrated telematics service, Mercedes-Benz Contact², is even more convenient: a touch of a button is all it takes to contact the Mercedes-Benz customer centre. If you wish, relevant vehicle and position-related data are transmitted at the same time, thereby allowing the centre to react quickly and provide rapid on-site assistance. Also standard with your new car at no extra charge is the Mercedes-Benz Mobilo³ mobility package. Whether you have lost your key, had a breakdown which cannot be repaired immediately or suffered damage to the vehicle due to an accident or vandalism, Mobilo helps you reach your destination – anywhere in Europe. Whatever is holding you up, you will soon be able to resume your journey.

Mercedes-Benz Museum. Discover what has been moving the world for over 125 years, and embark on a fascinating journey through automotive history in the Mercedes-Benz Museum. More than 1500 exhibits covering an area of 16,500 square metres chart the unique heritage and innovative flair of the inventor of the motor car. You will find one automotive legend after another awaiting you: unique pieces such as the oldest Mercedes still in existence from 1902, supercharged cars or the awe-inspiring Gullwings. The museum is a spectacular sight in its own right too, thanks to an architecture that breaks away from traditional concepts and creates an unprecedented sense of space. Welcome to the Mercedes-Benz Museum – a world of innovation. www.mercedes-benz-classic.com/museum

¹ Alternative: +49 69 95 30 72 77. ² Requires a factory-fitted radio, connected to an operational mobile phone. The only charge incurred is the cost of the mobile phone call to the landline network. ³ Once the mobility guarantee has expired (four years), Mobilo can be extended to provide cover in the event of breakdown and insurance claims one year at a time for a maximum of 30 years, provided that regular maintenance is carried out by your Mercedes-Benz service partner.

Test drive. The unique feeling of driving a Mercedes cannot be put into words – you have to experience it for yourself. Take a test drive and find out first hand how it feels to drive your dream car. Please contact your nearest Mercedes-Benz dealer for details.

Interactive Owner's Manual and Mercedes-Benz Guides.

The website also offers an interactive tour, enabling you to acquaint yourself with your dream car. You can view key functions in detail, gain an insight into the car's inner workings or look at the benefits of each model. For further details, go to www.mercedes-benz.de/owners-manual. The "Mercedes-Benz Guides" app lets you explore the highlights of the individual models both online and offline. The app is available free of charge from the Apple® iTunes® Store (iOS) as well as the Google Play store (Android).

Mobile internet. The whole world of Mercedes-Benz can be explored at any time with your web-capable mobile device – including specially adapted content for both smartphones and tablets. As well as an overview of all the passenger car models, there are insights into the entire brand world along with a wealth of entertainment offers and direct links to our range of services at www.mercedes-benz.com

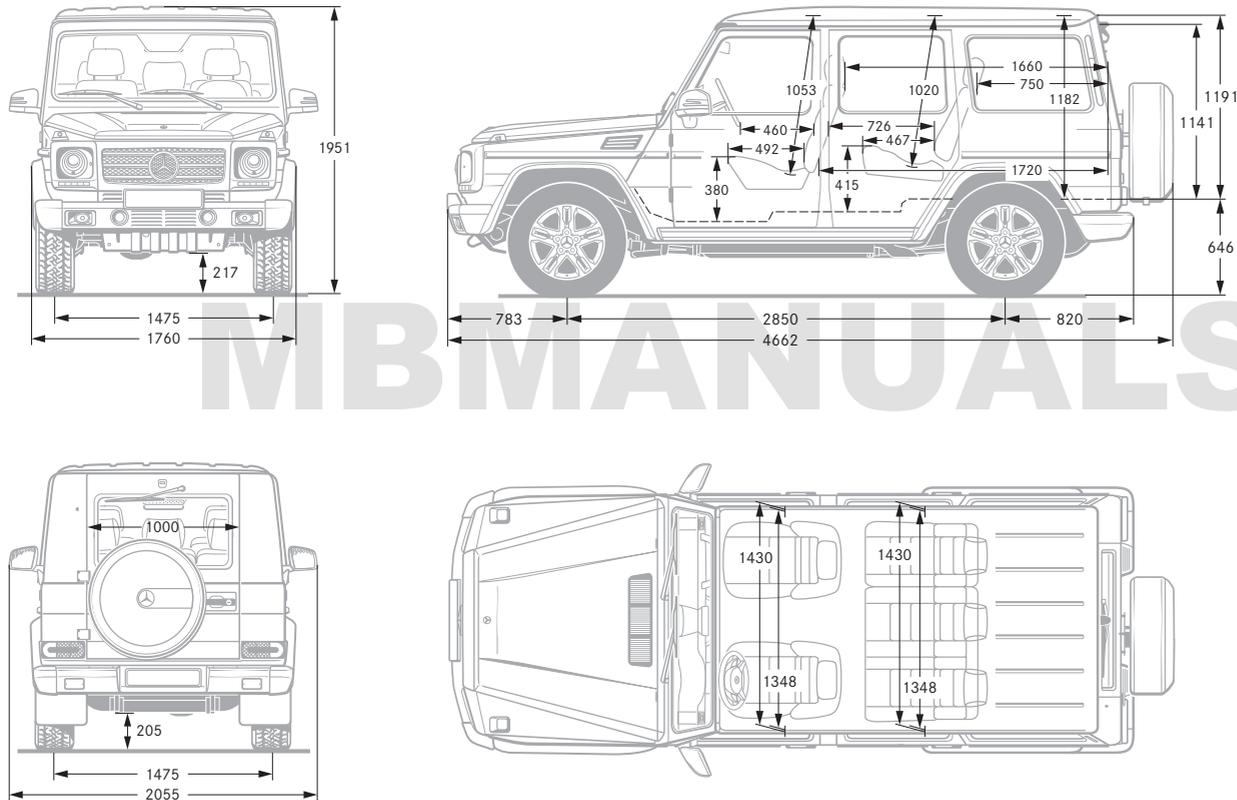

Mercedes-Benz service contracts. You need never worry about unexpected workshop costs⁴ again: depending on the specific contract, a Mercedes-Benz service contract can cover unforeseen repairs, maintenance or wear parts. As a result, your vehicle stays in great condition – thanks to the Mercedes-Benz quality you can expect from our highly qualified workshop specialists and Mercedes-Benz genuine parts. Your Mercedes-Benz dealer will be pleased to tell you more about the available service contracts and terms and conditions.

Accident repairs. Should the worst happen and you find yourself in need of repairs, with the Mercedes-Benz accident repair service you will receive the right assistance for your vehicle and ensure that its high-quality safety features are properly maintained. Whether you need paint, body or glass repair work carried out, the highly trained specialists at your Mercedes-Benz service partner will repair your Mercedes-Benz and get you quickly back on the road again. Further information is available from your authorised Mercedes-Benz dealer.

⁴ In accordance with the terms and conditions of the Mercedes-Benz service contracts.

Urban	13.6	20.0	20.0
Extra-urban	9.8	11.9	11.9
Combined	11.2	14.9	14.9
CO ₂ emissions ² (g/km) comb.	295	348	348
Emission class	Euro 5	Euro 5	Euro 5
Tank capacity (l)/of which reserve approx.	96/14	96/14	96/14
Turning circle diameter (m)	13.6	13.6	11.3
Kerb weight ³ /perm. GVW (kg)	2570/3200	2530/3200	2380/2850
Perm. towing capacity ³ (kg) braked/unbraked	3500/750	3500/750	2850/750

¹ Figures in accordance with Directive 80/1269/EEC in the currently applicable version. ² The figures shown were obtained in accordance with the prescribed measuring process (Directive [EC] 715/2007 in the currently applicable version). The figures are not based on an individual vehicle and do not constitute part of the product offer; they are provided solely for the purposes of comparison between different vehicle models. ³ Figures in accordance with Directive 92/21/EC, version 95/48/EC (kerb weight with fuel tank 90% full, driver, 68 kg, and luggage, 7 kg) for standard-specification vehicles. Optional extras and accessories will generally increase this figure and reduce the payload capacity accordingly. You can find further technical data at www.mercedes-benz.com

MEYER CARAT

Take-back of end-of-life vehicles. You can return your G-Class to us for environment-friendly disposal in accordance with the European Union (EU) End-Of-Life Vehicle Directive. But that day lies a long way off.

A network of vehicle take-back depots and dismantlers has been established to make it as easy as possible for you to return your vehicle. You can leave it at any of these points free of charge and, by doing so, make an important contribution to completing the recycling process and conserving resources.

For further information about the recycling and disposal of end-of-life vehicles, and the take-back conditions, please visit the national Mercedes-Benz website.

Please note: changes may have been made to the product since this brochure went to press (31.01.2013). The manufacturer reserves the right to make changes to the design, form, colour and specification during the delivery period, provided these changes, while taking into account the interests of the vendor, can be deemed reasonable with respect to the purchaser. Where the vendor or the manufacturer uses symbols or numbers to describe an order or the subject of an order, no rights may be derived solely from these. The illustrations may show accessories and items of optional equipment which are not part of standard specification. Colours may differ slightly from those shown in the brochure, owing to the limitations of the printing process. This brochure is distributed internationally. It provides a general indication of the range of models, features, optional extras and colours available in various countries. Some of the models, features, optional extras and colours shown may not be available in your country or may only be available in a different specification. Additionally some models, features, optional extras and colours may only be available in combination with others. For current and more specific information in relation to the range of models, features, optional extras and colours available in your country, and their pricing, you should contact your nearest authorised Mercedes-Benz Passenger Car Dealer. www.mercedes-benz.com
